

# Benefits of desexing your pet

**For the boys** it can reduce their tendency to become aggressive and their urge to go roaming for a mate. It can **reduce their risk of prostatic infection** and help with their trainability, as well as ensuring they have no risk of testicular cancer.

**For the girls** it will stop them from coming into season and attracting unwelcome attention from the boys and from ever having **ovarian and uterine cancers**. If they are desexed before their first season it can **minimise the risk of breast cancer**. Desexing can also help with their trainability and make them happier members of your family.

1. Please ask for Pre-visit medications to reduce your pet's anxiety during their stay with us.
2. You are certainly welcome to bring in their favourite toy or blanket.
3. We can accommodate special requests, such as staying with your pet during the sedation phase of the procedure prior to the general anaesthetic. However, this needs to be pre-arranged with us so we can adjust our schedule also.

**17 Bellambi Lane, Russell Vale, NSW, 2517**  
(between Bellambi Pub and the Northern Distributor, opposite Bunnings)

Saturday: 9am to 12pm  
Sunday and public holidays: Closed

Do you want a vet who knows as much about your pet as you do?

# Desexing procedure

## CHOOSE YOUR DESEXING PACKAGE 2018

At Russell Vale Animal Clinic we aim for optimal care of your pet while staying with us. This is why we offer you the choice of 2 types of packages for your pets desexing operation.

### Standard

- » A full check up
- » Hospitalisation, Anaesthetic Plan, procedure & monitoring
- » Dissolving skin sutures (no outside stitches)
- » The Actual Surgery
- » Pain relief before, during and after the procedure (up to 24 hours)
- » Desexing Certificate, update microchip database, Tattoo for girls
- » Detailed Home care notes

### Deluxe – Our “Pamper” Pack

- » All what is in Standard.... But much much more
- » Pre-anaesthetic blood tests to check that the inside is healthy too (with Feline viral studies for cats (FIV/FELV))
- » Intravenous fluids – for extra body support
- » Intra-surgical local anaesthetic
- » Full dental charting including dental xrays OR Hip dysplasia test including extended frog leg view xray if Ortolani is positive or high risk breed
- » **3 days** extra pain relief plus **3 laser** therapy sessions and E collar if required.
- » All post operative checks included too!

## OUR COSTS\*

We offer different packages, because your pet's welfare is important to us, as well as our relationship with you. We want to be upfront about the expected cost of your pet's procedure before the day.
